EXPERIENCE

- islakonek – Contact Management System**June 2024 – August 2024
- Student Software Engineer | CVISNET Foundation Inc., IT Park, Cebu City
- Built a full-stack contact management system using PHP Laravel, MySQL, and modern CSS frameworks, delivering a complete solution within the internship period.
 - Implemented CRUD operations leveraging Laravel's MVC architecture, resulting in clean, maintainable, and scalable backend code following industry best practices.
 - Designed and deployed a responsive front-end interface, improving accessibility, usability and overall user experience.

SELECTED PROJECTS

- PhytoScan — Phytoplasma Disease Recognition Mobile Application**December 2025 – May 2026
- AI/ML Engineer & Mobile App Developer | Visayas State University
- Serves as Undergraduate Thesis Project, demonstrating end-to-end research and development from dataset collection to mobile deployment.
 - Collected and preprocessed image datasets independently using rescaling and offline data augmentation techniques to ensure robust model training data.
 - Trained and evaluated four CNN architectures (MobileNetV2, ResNet34, EfficientNetB0, and a custom Baseline CNN), selecting the best-performing model based on accuracy, precision, recall, f1-score and Cohen's Kappa coefficient.
 - Converted the highest-performing model to TFLite and integrated it into a fully offline Android mobile application for use in low-connectivity agricultural environments.
 - Designed and developed a user-friendly mobile interface tailored for agricultural workers with minimal technical background.
 - Evaluated overall application quality using the ISO/IEC 25010 standard.

- Comparative Analysis of Machine Learning Model**December 2026
- AI/ML Engineer | Visayas State University
- Applied various image preprocessing and feature extraction techniques to prepare and clean datasets for model training.
 - Trained, evaluated, and compared multiple ML algorithms to systematically identify the most accurate and efficient approach for the given classification task.

- GymGenius – Desktop Gym Management System**January 2023 – May 2023
- Desktop Application Developer | Visayas State University
- Designed and developed a desktop-based gym management system using C# and the .NET Framework, covering full application design to deployment.
 - Automated key gym operations — including membership management, scheduling, payments, and equipment tracking — reducing manual administrative workload.
 - Implemented a centralized SQLite database for managing customer and staff records, ensuring data integrity and efficient query performance.

TECHNICAL SKILLS

- Languages:** C/C++, Python, Java
- Frameworks & Libraries:** Flutter, Laravel, TensorFlow, Keras, OpenCV, NumPy, Matplotlib, Scikit-Learn
- Database:** MySQL
- Tools & Platforms:** Github, Figma, VS Code, Jupyter Notebook, Google Colab
- AI & ML:** Deep Learning, Machine Learning, Image Processing, Feature Extraction, Extract Transform Load (ETL)
- Methodologies:** SDLC, MVC Architecture, OOP Approach
- AI Assisted Tools:** Claude Code, ChatGPT, Gemini

EDUCATION

Visayas State University – Main Campus

October 2020 – July 2026

Bachelor of Science in Computer Science | Pangasugan, Baybay City, Leyte

CERTIFICATIONS

- DICT Diagnostic Exam Passer – *Department of Information and Communication Technology*
- On-The-Job Training Course – *CVISNET Foundation Inc.*
- Machine Learning 101: Demystifying the Magic – *XALTIUS PTE. LTD.*
- Fundamentals of Python Programming – *Data Analytics Philippines*
- Fundamentals of Statistics with Microsoft Excel – *Data Analytics Philippines*
- Querying Fundamentals with MySQL Essentials for Beginner – *Data Analytics Philippines*
- Introduction to Quantum Natural Language Processing (QNLP) Lecture Series - *Quantum Computing Society of the Philippines*
- Getting Grounded on Analytics - *Analytics Association of the Philippines*
- 2024 Handa Pilipinas: Visayas Leg - *Department of Science and Technology*
- LinkUp Day with Full Scale (Career Talk) - *Full Scale*
